PRODUCT CATALOGUE

# Little ONE

Company history begins in 1989 and today Mealberry is a dynamic, fast growing international company, developing and manufacturing the highest quality pet products, with production facilities in Germany and Russia.

In order to guarantee the highest quality and service for our customers at a reasonable price, we adhere to a company philosophy based on four strategic pillars:

- Strict quality control
- Ongoing communication and strong relations with our partners, customers, veterinarians and breeders
- Continuous product improvement and innovation
- Implementation of latest production technology

Our diverse range of more than 170 products includes:

Little One (feeds, snacks, treat - toys, hay and care products for small mammals)

RIO (feeds, treats, care products, vitamin and mineral supplements for pet birds as well as products for feeding birds in the wild)

### Listening to our Customers

All Company actions strive to reach the goal of ensuring the perfect quality of our products. We continuously monitor customer feedback and take it into account when developing our new products. In addition we actively work with breeders, offer various promotional programs and sponsor pet animal and bird shows.

### Marketing Support

We pride ourselves on the level of marketing support we offer our clients – marketing campaigns, education seminars for pet shop employees, provide shop equipment and a wide range of promotional materials.

## TREAT-TOYS

### Little One treat-toy Flower bowl

Flower bowl is made from meadow grass and marigold flowers which are dried in such a way as to preserve the maximum of useful carotenoids. Delightful combination of herbs and flowers provides the optimal balance of nutrients. The basket is hard enough to serve as a dental care tool for rodents and rabbits.

Ingredients: meadow grass, derivatives of vegetable origin, marigold flowers, red millet, wheat.

### Little One treat-toy Tasty bluebell

Tasty bluebell is made from meadow grass. The bell will not only be an amusing toy, but also a source of vitamins, minerals and fibre required for proper digestion of rodents and rabbits. The unusual shape of the treat will be the main attraction for your pet. Besides, the animals will be able to grind down their constantly growing teeth.

Ingredients: meadow grass, derivatives of vegetable origin, red millet, wheat.

### Little One treat-toy Vegetable pizza

Pizza is one of the most delicious Italian dishes, popular all over the world. Little One vegetable pizza is designed specially for decorative pets. The pizza shape is very handy for nibbling, which helps rodents and rabbits to wear down their perpetually growing incisors.

Ingredients: meadow grass, derivatives of vegetable origin, dried vegetables (tomato, parsnips, zucchini, sweet pepper), marigold petals.

### Little One Tasty bowl from meadow grasses, assorted

Tasty bowl is made of fragrant meadow grasses and filled with one of the six tasty and beneficial ingredients: parsnip, zucchini, apple, pumpkin, carrot or rosebuds (2 bowls of each type are included in show-box).

This treat-toy will entertain your pet for a long time and serve as a dental care tool. Besides it's a perfect source of vitamins, minerals and fiber required for proper digestion of rodents and rabbits.

Ingredients: meadow grasses, derivatives of vegetable origin, dried apple / dried zucchini / dried pumpkin / dried rosebuds / dried parsnip / dried carrot (depending on the filling).

### Little One Stick from meadow grasses, assorted

Stick is made of fragrant meadow grasses and covered with one of the three delicious toppings: marigold flowers, carrot or mallow flowers (3 sticks of each type are included in show-box). Due to its shape the stick will attract your pet and will help to grind down its constantly growing teeth while all included ingredients will help to enrich the diet with vitamins, minerals and fiber required for proper digestion of rodents and rabbits.

Ingredients: meadow grasses, derivatives of vegetable origin, dried carrot / mallow flowers / marigold flowers (depending on the topping).

### Little One "Tasty maze" tunnel (big)

Made of fragrant meadow hay, flower petals and hop cones, the "Tasty maze" will provide great entertainment for your pet. The tunnel can be gnawed, rolled around inside the cage, used to creep through, hide in and sleep. These pastimes will be a source of fun for your pets for a long time. Big tunnel (diameter 13 cm) will offer a natural environment for your animal, while flower petals will provide the necessary vitamins and minerals. The tunnel is fully edible. Ingredients: meadow grass, derivatives of vegetable origin, flower petals (wild rose, marigold, hibiscus, sunflower, cornflower), hop cones, cardboard tube.

### Little One "Tasty maze" tunnel (small)

Little One "Tasty maze" tunnel will become a wonderful toy. Pets will find that crispy corn flakes, pieces of carrots and grains taste so good and the tunnel-like shape of the toy will keep the little friend busy for a long time. Tunnels are produced in two variants. Small tunnel (diameter 5 cm) is suitable for hamsters, mice and gerbils. The tunnel is fully edible. Ingredients: dried vegetables (peas flakes, carrot, zucchini, parsnip, pumpkin), derivatives of vegetable origin, white sorghum, safflower seed, dried fruits (banana, pineapple, carob), puffed grains (maize, wheat, barley), cardboard tube.

### Little One Biscuits with carrot and spinach for small animals

Little One Biscuits are a tasty and healthy addition to the daily ration of omnivores rodents. Carrot and spinach contained in biscuits make the treat especially tasty. Ingredients: cereals, eggs and egg products, sugars (including honey), dried vegetables (carrot and spinach), bakery products.

## SNACKS. Snacks in jars

### Little One snack Carob

Carob or locust tree beans are unique beans that grow in the Mediterranean region only. This unique fruit was even mentioned in the Bible because of their extraordinary nutritious properties. Carob is rich in B vitamins, calcium, iron, magnesium and other minerals. Because of their sweet taste locust beans seem to be the favorite of all pets. Ingredients: carob.

### Little One snack Herbal crunchies

Pets will appreciate the crisp herbal crunchies made of selected grains and dried herbs. These herbal crunchies are not only a great source of fibre which stimulates digestion but also a means for grinding down teeth. Ingredients: corn, dried herbs, wheat, wheat bran, barley, oat, sunflower oil.

### Little One snack Dried carrot

Before we use dried carrots in our pet feed, it is processed by means of high-tech drying, thus preserving carrots taste and nutrients intact. Some carrot flakes on the everyday diet will make the pet active, strengthen its immune system and stimulate regeneration processes in the body.  
Ingredients: dried carrot.

### Little One snack Puffed grains

Puffed wheat, barley and corn are not just a treat all home pets adore. Puffed grains have a low bulk density and it turns proteins and carbohydrates into easy-to-digest nutrients.  
Ingredients: puffed wheat, puffed barley, puffed corn.

### Little One snack Fruit mix

Dried fruits, it's much more than a simple gourmet dish for home pets. Bananas are a highly nutritious product rich in potassium. Pineapples contain large amounts of carotene, vitamins A and C, different B vitamins, magnesium, chlorine, and iodine. Raisin is rich in mineral salts, organic acids and vitamins.  
Ingredients: dried banana, dried pineapple, raisin.

### Little One snack Berry mix

Assorted berries are the richest source of nutrients. Briar and dried rowan contain large amounts of vitamin C. Juniper has been known as a healing plant for many, many years. Its berries produce beneficial effects on the digestive system, as well as skin and fur of animals. Hawthorn berries, in addition to complex biologically active substances, also contain pectin which is an excellent detox tool.  
Ingredients: briar, dried rowan, chokeberry, hawthorn berries, juniper.

### Little One snack Pea flakes

Peas are delicious and nutritious feed for rodents. However, peas are very hard for gnawing. In a form of flakes it becomes available for all kinds of small mammals. The product is manufactured with a special technology at the moment of pea's harvest.  
Ingredients: pea flakes.

### Little One snack Vitamin C

Guinea pigs, chinchillas and other pets have a special need for vitamin C. Guinea pigs cannot synthesize the vitamin on their own, so they have to get in it sufficient quantities from their diet. Little One Vitamin C is a mix of berries, fruit, and vegetables with the maximum vitamin C content.  
Ingredients: dried rosehip, currant berries, sweet red pepper, orange peels, kiwi.

### Little One snack Vegetable mix

The Little One Vegetable Mix treat is a nutritious and tasty addition to the diet of rodents and rabbits. The mix, which consists of five types of dried vegetables, can help to vary the animals' diet and provide them with vitamins and other nutrients.  
Ingredients: dried carrot, parsnip, tomato, zucchini, pumpkin.

### Little One snack Insect mix

Insect mix is a delicious and nutritious complementary feed for omnivorous rodents and besides a valuable source of macro- & micronutrients. The mix is perfectly balanced and includes dried silkworm pupae, black soldier fly pupae, mealworms and crickets. Due to the included insects this snack is a great source of animal protein needed in the diet of omnivorous rodents and contains essential fatty acids, which beneficially effect on the pet's skin and coat.  
Ingredients: dried silkworm pupae, black soldier fly pupae, mealworms, crickets.

### Little One snack Mealworms

Dried mealworms are the perfect nutritious complementary feed for omnivorous rodents. It's not only their favorite snack, but also a valuable source of needed animal protein. Adding mealworms will help to diversify and enrich pet's diet.  
Ingredients: dried mealworms.

## SNACKS. Sticks

### RIO Hand feeding food for baby birds

This complete nutrient-dense hand-feeding food is specially formulated to meet the energy requirements of birds from hatching through to weaning. Vitamin D & highly digestible calcium help the baby birds to develop strong beak and bones. Vitamin A & amino acids are necessary for building healthy feathers and skin. Rich in proteins, fats and vitamins, the food also contains prebiotics (MOS) and beta-glucans, which support a normal gut microflora and contribute to a healthy development of the immune system. The nutrient rich formula helps baby birds to grow strong and healthy, wean earlier and develop a bright, fine plumage. The formula is tested, developed and recommended internationally by professional breeders to support the young bird's and optimal growth.

Ingredients: cereals, derivatives of vegetable origin, vegetable protein extracts, eggs and egg derivatives, various sugars, yeast extract, dried fruits (banana), minerals.

## COMPLEMENTARY FEED

### RIO Eggfood for budgies and small birds

RIO eggfood is produced from whole eggs with the addition of honey, vitamins and minerals. A combination of biotin and amino acids helps the bird to have healthy plumage. Rich in vitamins and other nutrients, RIO eggfood is an indispensable supplement during periods of growth, moulting, breeding, and whenever a weakened bird needs to grow its strength.

Ingredients: bakery products, cereals, oils and fats, vegetable protein extracts, healthy seeds, Niger seed, honey, eggs and egg derivatives, white perilla, casein.

### RIO Eggfood for parakeets and parrots

Multi-coloured extruded bits of food are oven-baked using a special technology to make them that crunchy texture that parakeets and parrots love so much. The special ingredients such as chili, spirulina and turmeric root are natural colouring agents and give the food bits their enticing and vibrant colour, while at the same time they make the food especially healthy and good for parakeets and parrots. Some crunchy delights for your feathered friend!

Ingredients: wheat meal, derivatives of vegetable origin, vegetable protein extracts, bakery products, honey, oils and fats, eggs and egg derivatives, calcium carbonate, red beet powder, spirulina powder, chili pepper powder, curcuma powder.

### RIO Gourmet food for budgies and small birds

This is a sophisticated, rich feed which contains a whole bunch of delicious and nutritious ingredients. Easily digestible proteins, healthy fats and fatty acids contained in whole eggs, dry insects and gammarus help to keep the bird's body in top shape. Fruit and berries (pineapple, papaya, rowan and juniper berries) contribute to a varied diet, while yeast extract boosts the immune system defences. The feed also contains added delicious and fragrant coriander seeds.

Ingredients: cereals, derivatives of vegetable origin, honey, vegetable protein extracts, oils and fats, dehydrated fruits and berries (raisins, papaya, pineapple, rowan berries, juniper berries), bakery products, silkworm pupae flour, gammarus, coriander seeds, eggs and egg derivatives), yeasts.

### RIO Gourmet food for parakeets and parrots

Both parakeets and parrots will be sure to appreciate the large and crunchy bits in this feed. The fruit, berries, vegetables and nuts that it contains will bring variety to the bird's diet. Egg white helps to maintain the bird's body in top shape, while vitamins and minerals provide an extra boost of energy and strength. Chili, spirulina and turmeric root give an enticing colour to individual slices and make them a special delight for parakeets and parrots.

Ingredients: bakery products, oils and fats, derivatives of vegetable origin, vegetable protein extracts, wheat meal, dehydrated fruits and berries (raisins, figs, juniper berries, pineapple, apple, papaya), buckwheat, healthy seeds, malt extract, dehydrated vegetables (carrot, chili pepper), honey, peanuts, eggs and egg derivatives, pollen, calcium carbonate, red beet powder, spirulina powder, curcuma powder.

### RIO Germination set

Germinated seeds and grains are a perfect alternative to seeds in a milky-wax stage, which make up the diet of the birds in natural environment. In comparison with a regular seed mixture, germinated seeds are full of enzymes, vitamins and minerals, which can help to prevent the effects of malnutrition. Ingredients: yellow millet, wheat, oat, mung bean, red millet, safflower, white sorghum, canary seed, buckwheat.

## SNACKS. Biscuits

### RIO Biscuits with wild berries for all types of birds

RIO biscuit treats are healthy and nutritious. They include such wild berries as blueberries, blackberries, raspberries, and strawberries, which will bring variety to the diet of decorative birds. They are especially recommended during the moulting and breeding period.

Ingredients: cereals, eggs and egg products, sugars (including honey), dried berries (blueberry, blackberry, raspberry, strawberry), bakery products.

### RIO Biscuits with healthy seeds for all types of birds

The rare seeds of cultivated plants included in this feed (such as clover, carrot, spinach, chicory and other seeds) help RIO biscuits to be more than a healthy and nutritious snack by bringing more variety to the decorative birds' diet. They are especially recommended during the moulting and breeding period.

Ingredients: cereals, eggs and egg products, sugars (including honey), healthy seeds (clover, carrot, spinach, chicory, rape, cress), bakery products.

## SNACKS. Sticks

### RIO Sticks for budgies and exotic birds with tropical fruit

Ingredients: yellow millet, canary seed, bakery products, red panicum, grinded oyster shells, red millet, peeled oat, dehydrated fruits (banana, orange, pineapple, kiwi), safflower, derivatives of vegetable origin, honey.

### RIO Sticks for budgies and exotic birds with honey

Ingredients: yellow millet, canary seed, red panicum, bakery products, peeled oat, red millet, grinded oyster shells, safflower, sesame, perilla seed, niger seed, honey, derivatives of vegetable origin.

### RIO Sticks for all types of birds with eggs and seashells

Ingredients: yellow millet, seashells, canary seed, bakery products, red panicum, eggs and egg derivatives, peeled oat, red millet, safflower, derivatives of vegetable origin, healthy seeds, sesame seed, honey.

### RIO Sticks for canaries with honey and seeds

Ingredients: canary seed, peeled oat, grinded oyster shells, bakery products, seeds (linseed, niger seed, perilla seed, sesame seed), honey, derivatives of vegetable origin.

### RIO Sticks for canaries with tropical fruits

Ingredients: canary seed, peeled oat, niger seeds, healthy seeds, grinded oyster shells, bakery products, perilla, linseed, dehydrated fruits (banana, apple, orange, kiwi, pineapple), sesame seed, derivatives of vegetable origin, honey.

### RIO Sticks for parakeets with tropical fruit

Ingredients: yellow millet, canary seed, white millet, safflower, dehydrated fruits (banana, raisins, orange, pineapple, kiwi), peeled oat, grinded oyster shells, buckwheat, sunflower seed, bakery products, red panicum, red millet, sorghum, wheat, sesame seed, healthy seeds, derivatives of vegetable origin, honey.

### RIO Sticks for parakeets with honey and nuts

Ingredients: yellow millet, canary seed, white millet, sunflower, bakery products, buckwheat, safflower, peeled oat, grinded oyster shells, red panicum, healthy seeds, peanuts, sorghum, red millet, wheat, derivatives of vegetable origin, honey.

### RIO Sticks for parrots with fruit and berries

## NATURAL TREATS

## RIO Cedar cone

RIO "Cedar cone" is an excellent treat and toy for parrots and other birds. By cracking pine nuts, birds will get healthy nutrients from the pine nuts. Pine nuts are rich in antioxidants, vitamins, and minerals. The RIO cone has been dried using a special technology which brings the resin content down dramatically. The treat comes with a handy chain and clasp to hold it in place.

1 pcs. - Art. 22060

## RIO Spray millet for birds

Spray millet is a favourite treat and toy for parakeets, canaries, amadinas and other kinds of birds. Similar to wild birds in nature, caged birds get great pleasure plucking the fresh grains from the panicles. Due to the natural preservation and thin husk, grains from ears are better digested by birds. RIO Spray millet is handpicked, carefully dried and stored in a controlled environment, which guarantees freshness and nutrition.

## RIO Fruit & Nuts mix

This delicious and healthy fruit and nuts mix consists of natural dried fruits, crunchy nuts, berries and seeds that are liked by parakeets and parrots. This treat is an excellent source of additional energy, vitamins, macro- and microelements and brings variety to the bird's daily diet. The individual ingredients can also be used to encourage your pet to learn new skills and build up a trusting relationship with them.

Ingredients: sunflower seed, raisin, dried banana, pumpkin seed, dried papaya, dried pineapple, dried apricot, coconut, almond, walnut, dried apple, juniper berries.

e 160 g - Art. 22250

### RIO Songbird mix

The RIO Songbird mix contains carefully selected ingredients which songbirds enjoy in the wild. This treat is rich in vegetable proteins, polyunsaturated acids, vitamins, minerals and biologically active natural substances, that support the birds during stressful times like the moulting period. The addition of fennel and anise in composition provides essential oils that benefit the appetite, have a restorative effect and attract the birds' attention to the treat. This delicious nutritional composition is a source of energy and well-being that encourages your pet to sing loudly.

Ingredients: Niger seed, canary seed, rapeseed, linseed, hempseed, white millet, fennel seed, bakery products, sesame seed, poppy seed, aniseed, calcium gluconate.

### RIO Healthy seeds mix

The RIO Healthy seeds mix includes a variety of garden seeds, vegetables and field crops that greatly enrich the bird's daily diet and maintain well-being.

Seeds of basil, carrots, corn salad and lettuce stimulate appetite and augment digestion. Fennel seeds and wild rocket, according to ornithologists, have a pronounced restorative effect due to the essential oils they offer. The treat is a source of natural vitamins A, C and K, macro- and microelements, like calcium, iron and magnesium.

The seed mix also supports the pet birds during stressful periods like moulting, nesting and recovery after illness.

Ingredients: garden and meadow crops seeds mix (clover, basil, spinach, parsley, carrot, corn salad, wild rocket, fennel, lettuce), white millet, canary seed.

### RIO Wild seeds mix

The RIO Wild seeds mix is a tasty and healthy treat, which contains a variety of seeds that are the nutritional basis of many bird species in the wild. The blend consists of 16 healthy ingredients that maintain vitality and enrich the daily diet. Due to the small size of the seeds, this treat is perfect for budgies, canaries, exotic and wild birds.

Ingredients: Ray-grass, yellow panicum, Japanese millet, common millet, meadow fescue, white bentgrass, timothy grass, cocksfoot, Kentucky bluegrass, smooth brome grass, green foxtail grass, linseed, red clover, common plantain, rapeseed, green sorrel.

## VITAMINS AND MINERAL SUPPLEMENTS

### RIO Vitamin and mineral pellets for budgies and parakeets

Home pet birds often lack vitamins and minerals. For example, the organism of birds produces vitamin D3 only in the ultraviolet light. Due to lack of sunlight home pet birds can not synthesize sufficient amounts of vitamin D3.

RIO vitamin and mineral pellets include a special complex of essential vitamins, micro- and macro elements for ultimate nutrition and health of birds. When used on a daily basis, the complex eliminates the symptoms and adverse effects of an unbalanced diet. It helps to support immune system, improve eye sight, skin condition and plumage.

Ingredients: wheat, maize, soya beans, oat, beet molasses.

# WILD BIRD FEEDING

## RIO Fat balls

Fat balls are produced from animal fats, seeds and nuts and are suitable for feeding tits, finches and other wild birds throughout the year when food is lacking. The fat ball is in the net, which can be easily placed on the tree branch or the balcony. Besides, this net will not allow sparrows, pigeons and crows to take away the food from other birds.

Ingredients: seeds, cereals, animal fat, minerals, peanuts.

## RIO Peanut net

Peanut is rich in proteins and fat. It's an excellent source of nutrition for wild birds. It's easy to fasten the net in the tree's branch or in the balcony. Besides, the placement of the food in the special net won't let the city's birds (sparrows, pigeons and crows) to take away the food from other kinds of birds – tomtits, bullfinchs, chaffinchs, buntings and others.

## RIO Sunflower seeds

Sunflower seeds is the easiest way to feed birds in nature. Rich in protein and fats sunflower seeds is the rich nutrition source. Excellent for feeders filling.

We will be glad to see you among our partners and to offer you favorable conditions for joint cooperation. For more details, please, contact your manager.
